

The Amazon Today Sellercloud integration allows your warehouses and stores to easily and quickly manage Amazon Today orders.

The InfiPlex Connector is fully integrated with Amazon Today and standard Sellercloud APIs, managing the full Amazon Today order process, and integrated directly with your Sellercloud account.

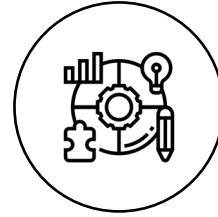

InfiPlex is a No Code Solution!

Challenges

- Direct Amazon Today SP-API integration requires significant time and coding effort
- The Amazon Today shipping process requires a specific order flow that does not fit with standard e-Commerce order systems
- Retail Store locations may not have access to the Sellercloud admin area to facilitate shipping

Solution

- The Amazon Today InfiPlex Connector
- Fully manage Amazon Today orders within Sellercloud's Shipbridge application, including canceling orders if needed
- InfiPlex Connector is an SP-API approved application that is already integrated with Amazon Today and standard Sellercloud APIs
- Option for retail locations to use the InfiPlex App to manage orders if they do not have Sellercloud access

Results

- Quickest time-frame to go live with Amazon Today
- InfiPlex maps Amazon Today Supply Sources to warehouse locations within Sellercloud
- Connect as many locations as needed
- Manage orders natively within Sellercloud Shipbridge application
- Sellercloud API integration simply needs your Sellercloud team name and a login
